BIOFLEX

SAFETY DATA SHEET

1. Identification of the Manufacturer

Europierce Worldwide Ltd, 39 Ashley Road, Bournemouth BH1 4LG, United Kingdom.

2. Information on ingredients

The material used for BioFlex products contains no substance classified as hazardous, in concentrations which should be taken into account according to EC directives.

3. Hazards identification

The product is not classified as a dangerous preparation (EC).

4. First aid measures

No specific instruction needed.

5. Fire fighting measures

Extinguishing agents: Water in spread jet, dry chemicals, foam or carbon dioxide should be used.

The product burns, but is not classified as flammable. Principal toxicant in the smoke is carbon monoxide.

6. Accidental release measures

All spill of BioFlex Products must be removed immediately to prevent slipping accidents.

7. Handling and storage

The product is to be stored in a clean and dry condition and at ambient temperature.

8. Physical and chemical properties

Appearance: finished product in the shape of balls or bars/discs, odorless, transparent

Ignition temperature: > 300 °C Solubility: insoluble in water.

The Product can be sterilized by steam.

9. Stability and reactivity

The product is a stable thermoplastic, with no chemical reactivity.

10. Toxicological information

The product is not dangerous.

11. Ecological information

The product is not considered dangerous for the environment.

12. Disposal considerations

Reuse or recycle if not contaminated. The product may be safely used as fuel or landfill. Proper combustion does not require any special flue gas control. No leakage is generated in landfills. Check with local regulations.

13. Transport information

The product is not regulated by ADR/RID, IMDG or IATA.
